

AMERICAN FINANCE ASSOCIATION

Report of the Editor of *The Journal of Finance* for the Year 2010

CAMPBELL R. HARVEY, EDITOR

I AM HAPPY TO REPORT that 2010 was another good year for *The Journal of Finance*. We received 1,170 submissions, of which 1,047 were new manuscripts. The number of new submissions rose slightly from 2009. Resubmissions appear to be down in both 2010 and 2009, but this is a result of *The Journal of Finance* no longer counting “style” revisions in the official revision count.

In 2010, the *Journal* published 68 articles, written by authors whose primary affiliations include 85 different institutions. Table I details the number and timing of submissions received throughout the year. The primary affiliations are summarized in Table II, which reports the number of authors per institution (where an article with n authors is counted as $1/n$ articles for each author’s institution). The institutions with the most *Journal* authors last year were the University of Chicago, Northwestern University, and Stanford University.

The *Journal*’s visibility and impact remain extremely high (see Table III). Articles published in the *Journal* were cited 18,039 times across all journals during 2009, a total that ranks first among business and finance journals and third among all economics journals (behind the *American Economic Review* and *Econometrica*). Our 1-year impact factor (cites during 2009 to articles published in 2007 and 2008, divided by the total number of articles published in those 2 years) is 3.76, which ranks second among business and finance journals and seventh among all economics journals. The 5-year impact factor is 6.536 and ranks fourth among all economics journals (behind the *Journal of Economic Literature*, the *Quarterly Journal of Economics*, and the *Journal of Political Economy*).

Turnaround time remains good, with 70.1% of the editorial decisions taking less than 70 days and only 17% taking over 100 days. This is an improvement over last year’s 69.0% and 18%, respectively. Table IV provides details on turnaround for the editorial decisions made during 2010. Figure 1 compares turnaround over the 2007 to 2010 period. The median turnaround time decreased in 2010 to 43 days from 45 days in 2009. The average also decreased. Again, note that 2009 is the first year that style revisions were omitted from the calculation. As such, 2009 and 2010 should not be compared directly to the earlier data.

Let me comment on the 17% of papers that take more than 100 days. First, most of these papers are in the 100- to 120-day range. As of December 31,

Table I
Submission and Resubmission Timing

2010				2009			
Month	Subs	Resubs	Total	Month	Subs	Resubs	Total

Dec.	89	10	99	Dec.	94	10	104
Total	1,047	123	1,170	Total	1,020	138	1,158

2010, no paper was currently in the review process more than 187 days. In some cases, the lateness plays to the advantage of the author. For example, the paper that was 187 days in review (decision made January 2, 2011) was a result of a second sequential referee assigned after the first referee had recommended rejection. In addition, for many of these papers the Associate Editor prepares detailed comments—after the referee reports are received. Finally, I provide detailed comments on many of these manuscripts. This extra feedback adds to the turnaround time. However, this is deliberate. My strategy is to get maximum feedback in the first submission so that the second submission is ready to be accepted.

Table V provides information on the *Journal's* acceptance and rejection rates. The number of acceptances decreased in 2010 compared to 2009. The backlog of unpublished accepted articles is less than a year, meaning there is a fairly short time from acceptance to publication.

Table V also points to two important metrics. First, the probability of the Editor asking for a revision on the initial submission increased slightly in 2010 to 12.51% from 12.38% in 2009. The other substantial metric is the number of rounds to acceptance. Figure 2 shows that the proportion of papers accepted after the first revision is 51%. After two revisions, 83% of the papers are accepted.

As has been said before, the *Journal* reflects the collaborative efforts of a great many people. My Co-Editor, John Graham, and the Associate Editors do a wonderful job in filling the role I have asked of them. Last year, the *Journal* relied on over 700 referees who, with few exceptions, made time in busy schedules to provide the type of diligent and prompt feedback that continues to play a vital role in the *Journal's* success. (Appendix A lists the individuals who refereed for the *Journal* during 2010.) Clearly, you, the members of the Association, value the *Journal* highly, and it has been a great honor and privilege for me to have been entrusted with its care.

We continue to work with Bepress in making refinements to the system, and I believe the electronic system has proven to serve our needs rather well.

One of the most important reasons for the smooth functioning of our journal is our Assistant Editor, Wendy Washburn, who is a huge asset to the *Journal*. Not only is Wendy vital in keeping the many day-to-day activities of the editorial office running smoothly, as many of you have probably experienced as

Table III

*Reflects some of Robert Stambaugh’s decisions for the papers grandfathered from his tenure (only two in 2010).

**Total turnaround in 2010 {2009} (2008) [2007] of 1,191 {1,110} (1,201) [1,320] is different from the submission statistics of 1,170 {1,158} (1,191) [1,298] because some of the decisions reflect papers submitted in the previous year, 2009 {2008} (2007) [2006]. In addition, 2009 is the first year in which “style” revisions are not included in the submission statistics.

*Note: 2009, 2010 do not include 100 quick “style” revisions

Figure 1. Turnaround Time: 2007 to 2010.

**Total turnaround in 2010 {2009} (2008) [2007] of 1,191 {1,110} (1,201) [1,320] is different from the submission statistics 1,170 {1,158} (1,191) [1,298] because some of the decisions reflect papers submitted in the previous year 2009 {2008} (2007) [2006].

First, over the past year, I worked closely with the Editorial Advisory Committee (EAC) of the American Finance Association.

Second, I have been working closely with the editors of the *Journal of Financial Economics* and the *Review of Financial Studies* to work out a Replication Policy that would apply to all finance journals. This work is ongoing.

Third, I have been working to develop a Disclosure Policy that would apply to *Journal of Finance* papers.

Fourth, I have been working with Wendy to draft detailed instructions for each aspect of the *Journal's* business. This both serves risk-management purposes and lays the foundation for a smooth transition to the new Editor in July 2012.

Each year the *Journal* awards a number of prizes for articles that it has published. The eligible papers for the 2010 prizes were all those published in the six issues of the *Journal* from December 2009 through October 2010. The Smith Breeden prizes, which recognize articles in all areas except corporate finance, consist of one first prize of \$10,000 and two distinguished-paper prizes of \$5,000 each. This year there was a three-way tie for second place and thus we awarded three distinguished-paper prizes of \$3,333. The Brattle Group awards, which recognize articles in corporate finance, consist of one first prize of \$10,000 and two distinguished-paper prizes of \$5000. The Associate Editors nominated the papers. We then formed a list of finalists from which the Associate Editors voted for the prize winners. Assistant Editor Wendy Washburn handled the balloting. This year there were seven finalists for the Smith Breeden prizes and eight finalists for the Brattle prizes. Appendices B and C list the winning

Figure 2. Proportion of papers accepted after first and second revisions.

papers as well as the finalists. On behalf of the *Journal*, I have congratulated all of the authors of the nominated papers. The prizes were announced at the American Finance Association business meeting in Denver.

Appendix A: Reviewers

The Journal of Finance would like to thank the following individuals, who served as referees over the past year. Without their help, the *Journal* could not fulfill its mission.
